the 5th international visual field symposium of the international perimetric society was held on october 20 23 1982 in sacramento california before the joint meeting of the international congress of ophthalmology and the american academy of ophthalmology a majority of the members of the international perimetric society took part in the meeting together with many guests the topics of the symposium were glaucoma correlation between the visual field and the optic disc the visual field in low tension glaucoma neuro ophthalmology and ergo perimetry apart from this there were many papers on automated perimetry and general topics the papers concerning the correlation of optic disc and visual field dealt with several aspects peripapillary atrophy defects in the retinal nerve fiber layer fluorescein angiography and the characteristics of the glaucomatous excavation itself new and interesting findings were presented showing that the careful detailed observation of the disc and peripapillary area is rewarding the visual fields in low tension glaucoma were studied extensively by four groups various approaches to the problem have led to some differences in results which were extensively discussed in the general glaucoma session the visual fatigue phenomenon was discussed extensively apparently conflicting results were demonstrated regarding the stability of contrast threshold measurements during one and the same test session in glaucoma the relationship between the visual field and the performance at the working place was considered in the session on ergo perimetry

a comprehensive survey on the use of bedside skills and perimetric devices to the test visual fields and how to interpret the results to develop the clinician s interpretative skills the authors include a chapter on visual anatomy and an atlas of 100 real life cases arranged in anatomic order from retina to striate cortex by placing a brief clinical vignette with a visual field on one side of the page and a description of the field and its causal lesion on the opposite side the reader will be able to learn interpretation in a simulated clinical setting an additional quiz section of twenty randomly arranged visual fields provides readers with an opportunity to test their newly acquired skills
